- Package of 10 Spray Tan Applications | \$310 – Only \$31 each
- Disposable under garments | \$5.00

Here's What You Can Expect

- **Spray Tan Consultation** – When you arrive at The Spa on Green Street you will have a consultation with our spray tan technician to help you decide exactly what color you are hoping to achieve; from a healthy glow, to a light, medium, or dark tan. Then, assessing your natural skin color your technician will tell you if your goal is realistic or make a recommendation. For example if a pale, ivory skinned person wanted to be really dark it would not be recommended, however we could create a really gorgeous medium color tan.
- **Private Spray Tan Suite** – Next you will step into a private suite and undress. You may wear your own underwear or purchase our disposable under garments, bottoms must be worn but tops are optional. If you chose to wear your own undergarments or swim suit we recommend bringing something black to ensure it will not become discolored by the spray. Next your nails will be gently covered to prevent discoloration - if your hair is very light we will suggest your wear a shower cap, however we like to spray as close into the hairline as possible for a natural look.
- **Hand-Applied Spray Tan For Realistic Tanning Results** – You will stand on a towel in our tanning tent after stepping on to our “sticky feet” strips to protect the bottoms of your feet and our technician will talk you through all the positions you will stand in so that we can tan you all over. It takes just a couple of minutes to be sprayed and you will just feel a cool misting sensation. There is no need to be anxious about closing your eyes and holding your breath – when the time comes to spray your face the technician will tell you when to close your eyes and take breath – we will do everything possible to make the experience comfortable for you. The solution contains a bronzer that will leave you with an instant glow but this will wash off in your first shower, this is not your tanning solution, the DHA which creates the tan is under this and has absorbed into the skin. The bronzer is used as a guideline for the technician to see where the tanning solution has been applied. Don't be concerned when you see this wash off in the shower.
- **After Your Custom Spray Tan** – After a couple of minutes you will be ready to put your clothes back on. For best results we recommend something slightly loose and dark – and preferably no jeans. In rainy weather bring boots and an umbrella! Then wait at least 8 hours to shower so that your beautiful tan will last approximately 7 days. We carry a variety of products designed to help extend you tan that your technician will go over with you at the end of your session. These products will help extend the life of your sunless tan.

The Day Before Your Spray Tan Appointment

- Exfoliate the day before your treatment to remove dry, flaky skin that causes uneven tanning. Try our **SOS salt scrub** or **Body Glow treatment** for an all-over exfoliation.
- Shaving, waxing, facials, manicures and pedicures should be done before your tanning session.

The Day of Your Spray Tan Appointment

- Your skin should be clean and dry.
- **DO NOT** use bar soap as the residue can interfere with tanning results.
- Remove all makeup.
- **DO NOT** apply lotions or perfumes prior to getting sprayed
- Use deodorant very sparingly

What to Wear During & After Your Spray Tan Session

- You may tan in the garment of your choice. Bathing suits and underwear work well. We have disposable undergarments available for purchase if necessary.
- The DHA solution should wash out of most clothing
- Wear loose fitting clothing for after your tanning session. Tight clothes can rub off the DHA bronzer and smear the cosmetic bronzer.
- We recommend loose shorts, and a loose fitting t-shirt (**DO NOT WEAR JEANS**)

How to Maintain & Keep Your Spray Tan Looking It's Very Best

- Immediately after your spray tan session avoid activities that may cause you to sweat excessively
- Use the air conditioning in your car on a hot day.
- You must avoid water entirely for at least four hours.
- Ideally, wait at least eight hours (or more) before showering or bathing with any kind of soap or shower gel. We recommend the next day if possible.
- If you absolutely must shower before the eight hour period, wait at least four hours, and then use only water only to allow your tan to continue to develop.
- Apply moisturizer after the shower and every day after your tanning session. This will help prolong your tan.
- The "instant color" cosmetic bronzer will wash off just as it is designed to do.
- Do not take long hot baths or showers.
- Chlorine from a pool or Jacuzzi can cause your tan to fade faster.
- Ask your technician about the products available to help extend the life of your tan.
